MIDAAS is an IT system for the research-oriented Intervention Cardiologists struggling with patient data management and analysis.

The primary advantage of MIDAAS is the easy to learn & easy to use QCA capability built into the system. You are now empowered to do the powerful analysis right at your clinic without the need to send it to a Core Lab and bear the high premiums.

In addition to the QCA capabilities, the system also enables you to analyses your pool of cases based on various factors like stent thrombosis, MACE, MI and many more. All of this is built into a portable device, so you can store all of your cases in one place, organize it based on your preference, access it at a moment's notice and conduct all the necessary evaluations.

In all sense,
MIDAAS IS THE ULTIMATE TOOL
for the individual researcher.
