

“We are committed to the goal of Green Packaging”

We believe in championing sustainability by supporting our forest ecosystems.

About us

We manufacture a broad array of sustainable packaging options designed to meet the needs of industry since 1984. By using 100% FSC Certified material—our production has a much smaller environmental footprint than traditional packaging and still delivers an industry-leading product. As an ISO certified organization, we want to find new ways to move beyond conventional packaging methods, embrace change & create packaging that's kinder to the planet.

Problem: Customers today require sustainable packaging

Illegal Logging: A multi-million dollar industry, leaving an obvious mark of destruction on forests- gaping holes where our ancient trees once stood, stripping economic livelihood of locals & responsible companies: WWF

80% clients consider sustainable packaging as either important or extremely important with **74%** willing to pay a higher price for sustainable packaging of their products: Boston Consulting Group

FMCG plays a key role in curbing over 1/3rd of global greenhouse gas emissions contributing to climate change: Forbes
