We Innovate to Create Value

With growing population, urbanisation and the hunger for consumption has increased the production capability, but with this growth what has increased is wastewater. The waste water problem is becoming a major concern for 21st century. With depleting ground water it's time to find a solution to this problem.

For over two decades, Ashirvad has shaped the lives of rural and urban communities by providing advanced plumbing solutions for building, infrastructure, industrial and agriculture applications. We help communities with sustainable, innovative solutions for water management.

We lead the market by anticipating the rapidly evolving needs of customers and society. Looking at the current waste water problem, we bring to you **"Ashirvad Sewage Treatment Plant - Modular & Compact Hybrid"**.

Why Ashirvad Sewage Treatment Plant?

- Hybrid technology Process
- As per Industry 4.0
- Advanced Bio Media Technology
- Modular & compact design
- Pilot model is 75KLD (Under commissioning)
- Complies with latest PCB Norms
- Completely Automated operations
- Adherence to Safety Norms
- Consistent High Quality treated water

Advantages

1. Fully Standardized, short lead times,
2. Small Foot Print
3. Quick installation & commissioning
4. Automation Platform
5. Exceptional treatment performance
6. Complies with PCB norms
7. Quick response to treatment adjustments
8. High Degree of Operational flexibility

Software & Digital Solutions - Add on Features

- Level sensors, Level switches, Flow transmitters for enhanced safety.
- Customer Mobile app
 - Water quality & Utilization
 - Health & Energy Monitoring
 - Alerts & Notifications
 - Raise service request
 - Warranty Indicator
- Technician Mobile app
 - Remote Diagnosis
 - Data Analytics
 - Condition Based Monitoring
 - Asset & Inventory tracking
 - Warranty information
- R & D Web Portal (Energy, Diagnostic, Water quality assessment, Asset tracking, Reports, Insights)
