TDS Controller

Pure Water Recovery more than 50%

Smart Electricity cut off

HOT & COLD WATER DISPENSER

Simple & Exquisite Design. The water dispenser combines simple and exquisite style, and the compact design is perfect for limited space. What's more, This water cooler dispenser is a great feature for office or home settings.

You do not need to use an electric kettle to boil water, this water dispenser provides you instant hot or cold water, and keep warm, so you can enjoy your drinks whenever you want.

Two hot and cold switches at the back of the water dispenser- the red for stop heating, green for stop cooling.

As you may need the water dispenser in many public places like a library, an office, a restaurant etc,

Our Iron Removal Plant Advantages

Our plants remove iron up to 20 ppm from water and are available for capacities of 1000 LPH to 200000 LPH.

Our unit converts ferrous to ferric state in water and requires no aeration tank.

Our units are completely online and can work with solar pumps, overhead tanks and tube wells.

Our plants come with auto backwash technology using PLC (program logic control) based system for automation.

Application

Water Supply Scheme, Tea Gardens, Industries, Irrigation, Agriculture, Community Water Supply etc.

AUTOMATION

We Provide Fully Automatic Systems for Community Water Supply for Railways, PHE Etc.

WATER SOFTENER

It is mainly use for wastewater treatment.
It is used for water treatment in homes and factories.
It removes bed testes from water.
It is used in many places such as domestic areas, industrial areas, Schools, Hospitals, Malls for water softening.
Reduces deposits in geysers and utensils and keeps them Clean.

DEMINERALISATION PLANT

In the context of Water purification, ion-exchange is a rapid and reversible process in which impurity ions present in the Water are replaced by ions released by an ion-exchange resin. The impurity ions are taken up by the resin, which must be periodically regenerated to restore it to the original ionic form. (An ion is an atom or group of atoms with an electric charge. Positively-charged ions are called cations and are usually metals; negatively-charged ions are called anions and are usually non-metals).

WATER CHILLER

Our organization has successfully expanded its business in market owing to the offered elevated quality array of Water Chilling Units. Highly acknowledged in varied industries, our offered chilling units are available in variegated specifications and designs. Provided chilling units are manufactured by our adroit personnel using high grade components and cutting edge technology. In addition to this, customers can avail these chilling units from us at nominal prices.

250 - 1000 LPH

High capacity pump for high pressure.
Raw water pump with extra flow
Pentair Pressure Vessels
Stainless Steel Skid for the RO Plant
Extra protection from High Pressure and Low Pressure.
100 LPH product capacity
LPS protection for dry pump or low water condition
Based on advance Reverse Osmosis technology
Quality Product

PACKAGED DRINKING WATER PLANT

FULLY AUTOMATIC ISI CATAGORY PLANT

WE DEALS WITH

SWIMMING POOLS

We are engaged in rendering quality oriented Swimming Pool Construction service that includes semi olympic pool, kids pool etc. We have experienced and dedicated team of professionals who are expert in constructing swimming pools in hassle free manner within promised time frame. We construct swimming pool with proper utilization of available resources and advanced techniques as per information laid down by the clients. Additionally, our clients can avail this Swimming Pool Construction service at reasonable rates from us.

POOL FILTERS & PUMP

A pool filtration plant is used to treat swimming pool water so that its chlorine and PH levels are normal. It also works to remove unsafe elements such as bacteria and algae to make the water safe for everyone to enjoy in the pool. The foremost cause of infection from water is water-borne viral, fungal, and bacterial diseases, which can create difficult health problems. These can be avoided by a modern filtration plant that takes in water from the pool for cleaning.

POOL EQUIPMENTS

we are engaged in offering an excellent grade Swimming Pool Equipment. This equipment is used in swimming pools and ponds. The provided equipment is manufactured using the higher materials and accepted component at our end. Quality manager team at our unit opts for severe quality tests and scrutinized inspections. Along with it, this equipment is manufactured in accordance to set industry norms. In addition, clients can get the equipment at cost effective rates from us.

OUTDOOR FOUNTAIN

We are a dedicated company, engaged in providing service for Outdoor Water Fountain. Offered service is rendered by our experts who use hi-tech machines and technology for constructing of fountains. We also provide installation, repairing and maintenance serviced of fountains as per clients requirement. These complete services of Outdoor Water Fountain are offered to the clients at highly competitive price.

SOLAR POWERED WATER LIFTING SYSTEM FOR DRINKING WATER & AGRICULTURE PURPOSE

WATER VENDING MACHINE / ATM

Water ATM Can be installed at:

Public & Private Places

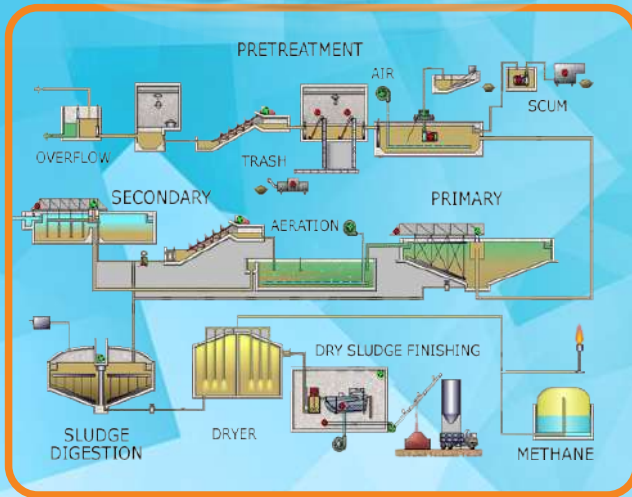

Bus Stops

Railway Station & Metro Stations

Hospital & Nursing Homes

We design and manufacture automated Self-Serve water vending machine that dispenses clean reverse-osmosis (RO) filtered, chilled drinking water at a very affordable cost. We are the one of first and the best manufacturer for WATER VENDING MACHINE (WATER ATM) in the Indian market and the leader in Water Vending Machine business startups.

SEWAGE & EFFULENT TREATMENT PLANT

SEWAGE TREATMENT PROCESS

We Design, Fabricate, Supply, Erect and Commission Sewage Treatment Plants (STP) for treating sewage generated by Industry, large colonies, Hotels, Hospitals, IT Parks and commercial buildings.

Now a days the Sewage Treatment Plant (STP) became statutory requirement of all the State Pollution Control Boards, everybody, whether Hotelier or Industrialist were looking for economical, easy to install and operate compact type Sewage Treatment Plant. Since the land is extremely expensive, very few industries could afford the large treatment units as recommended by most of the Consultants.

We are being pioneer in the field from last 13 years and always in the search of latest and techno-commercially viable technology, system by which the need of the society can be easily satisfied.
