What is Corn Silage

Corn silage is a nutritious, fermented feed made from whole corn crop, harvested at peak maturity to maximize energy content for livestock, especially cattle, sheep/goats.

Silage Benefits

- ✓ Best nutrition for livestock.
- ✓ Up to 12 months of shelf life.
- ✓ 20% increase in milk production.
- ✓ Faster weight gain in sheep/goats.
- ✓ Contains 7–9% crude protein*, 30–35% dry matter and digestible nutrition of 65-70%.
- ✓ Reduces labor expenses and feed cost by 50% each.
- ✓ Minimal nutrient loss and improved animal health.
- ✓ 2000 Kcal/kg digestible energy.

*crude protein proportion varies depending on moisture content

MVR SILAGE

About Us

- MVR Silage is a leading provider of high-quality silage and advanced silage manufacturing machinery, dedicated to enhancing livestock productivity and profitability

- With a decade of expertise in the silage industry, we have established a strong reputation across Pan India for delivering high quality silage and innovative solutions tailored to the needs of dairy and goat/sheep farmers
